

Clinical Education Manager- Centers of Excellence

Company Overview:

At Prytime Medical Devices, we have a bold vision; No one should bleed to death, and the sooner you stop bleeding, the better. We are working to revolutionize the care of severely injured patients by enabling trauma teams to gain control of life-threatening bleeding as a bridge to definitive repair. We partner with leading trauma centers to enable endovascular bleeding control through innovative devices and fanatical customer support. In support of our vision, we design, develop, and commercialize minimally invasive solutions for hemorrhage control. Our flagship product is the ER-REBOA-PLUS™ Catheter, the market leader for endovascular aortic occlusion in trauma. In addition to our national roll out of the ER-REBOA-PLUS™ catheter, Prytime was recently granted FDA clearance on a next generation partial REBOA catheter designed specifically to reduce ischemic insult and reperfusion injury called pREBOA-PRO™. We are following a very selective, data intensive approach to releasing this product. In doing so, Prytime is poised to create additional strategic opportunities and to lead the introduction of these devices in trauma and adjacent specialties. We are expanding our team to provide fanatical clinical support to improve outcomes with the launch of these new devices into the trauma and critical care market.

Reporting Relationships: The position of Clinical Education Manager reports to the Regional Clinical Education Manager.
